International Journal of Production Research

Volume 41, 2003—CONTENTS

No. 1 10 January 2003

Just-in-time purchasing and technical efficiency in the US manufacturing sector. H. KAYNAK and J. A. PAGÁN 1

Distributed allocation of the capacity of a single-facility using cooperative interaction via coupling agents. I.-J. JEONG and V. J. LEON 15

Integrated job release and shop-floor scheduling to minimize WIP and meet due-dates. A. ZOZOM JR, T. J. HODGSON, R. E. KING, A. J. WEINTRAUB and D. CORMIER 31

Tolerancing algebra: a building block for handling tolerance interactions in design and manufacturing. Part 2: Tolerance interaction. Y. S. HONG and T.-C. CHANG 47

Optimal lot-sizing, quality improvement and inspection errors for multistage production systems. M. BEN-DAYA and A. RAHIM 65

Observations on the interactions among deadlock avoidance policies and dispatching rules in automated manufacturing systems. H. AYTUG, A. BARUA, M. LAWLEY and R. UZSOY 81

Formulation of mobile agents for integration of supply chain using the KLAIM concept. S. MONDAL and M. K. TIWARI 97

Different initial sequences for the heuristic of Nawaz, Enscore and Ham to minimize makespan, idletime or flowtime in the static permutation flowshop sequencing problem. J. M. FRAMINAN, R. LEISTEN and C. RAJENDRAN 121

Practical considerations in the optimization of flow production systems. H. TEMPELMEIER 149

Development of computer-aided quotation system for manufacturing enterprises using axiomatic design. K.-Z. CHEN, X.-A. FENG and B.-B. ZHANG 171

Heuristics for scheduling sequence-dependent set-up jobs in flow line cells. V. REDDY and T. T. NARENDRAN 193

No. 2 20 January 2003

Computer-supported conflict resolution for collaborative facility designers. M. A. LARA and S. Y. NOF 207

Examination and comparison of the critical factors of total quality management (TQM) across countries. I. SILA and M. EBRAHIMPOUR 235

A generative process planning system for cold extrusion. S. KUMAR, K. SHANKER and G. K. LAL 269

Supply chain cell activities for a consumer goods company. S. K. MUKHOPADHYAY and A. K. BARUA 297

An approach based on fuzzy sets for manufacturing system design. D. GIEN, S. JACQMART, A. SEKLOULI and M. BARAD 315

Influence of the perception of the external environmental pressures on obtaining the ISO 14001 standard in Spanish industrial companies. J. Á. DEL BRÍO and B. JUNQUERA 337

Realization of a short cycle time in warehouse replenishment and order picking. B.-I. KIM, S. S. HERAGU, R. J. GRAVES and A. ST. ONGE 349

Modelling and diagnosis of feedback-controlled processes using dynamic PCA and neural networks. D. SHI and F. TSUNG 365

Configuration of cellular manufacturing systems using association rule induction. M.-C. CHEN 381

Timing constraints' optimization of reserved tasks in the distributed shop-floor scheduling. S. LEE and M. JUNG 397

No. 3 15 February 2003

Historical survey of manufacturing control practices from a production research perspective. K. N. MCKAY 411

Simulation-based comparison of push and pull systems in a job-shop environment considering the context of JIT implementation. J.-W. LI 427

Workforce planning and allocation for mid-volume truck manufacturing: a case study. M. GRONALT and R. F. HARTL 449

Recognizing features from engineering drawings without using hidden lines: a framework to link feature recognition and inspection systems. S. MEERAN, J. M. TAIB and M. T. AFZAL 465

Optimisation of cutting parameters for burr minimization in face-milling operations. S. H. LEE and S.-H. LEE 497

Manufacturing productivity improvement using effectiveness metrics and simulation analysis. S. H. HUANG, J. P. DISMUKES, J. SHI, Q. SU, M. A. RAZZAK, R. BODHALE and D. E. ROBINSON 513

Connecting transport AMHS in a wafer fab. J. T. LIN, F. K. WANG and C. K. WU... 529

Senior management perspectives and ISO 9000 effectiveness: an empirical research. A. C. L. YEUNG, T. S. LEE and L. Y. CHAN 545

Lead-time reduction in a stochastic inventory system with learning consideration. M. BEN-DAYA and M. HARIGA 571

Effect of tool finishing on ejection forces for injection moulded parts made using direct metal laser sintered tools. C. MAJEWSKI and N. HOPKINSON 581

Identifying environmental improvement options by combining life cycle assessment and fuzzy set theory. M. D. Bovea and B. Wang 593

Integration of process planning and scheduling by exploring the flexibility of process planning. Y. F. Zhang, A. N. Saravanan and J. Y. H. Fuh 611

Sensor-based stage Petri net modelling of PLC logic programs for discrete-event control design. S. Peng and M. Zhou 629

Call for Papers 645

No. 4 10 March 2003

Special Issue: Constraints Management: recent advances and practices
Guest Editor: Mahesh Gupta

Preface. M. Gupta 647

Framework for understanding the complementary nature of TOC frames: insights from the product mix dilemma. V. J. Mabin and J. Davies ... 661

Investigation of flow mechanisms in semiconductor wafer fabrication. S. Kim, K. R. Davis and J. F. Cox III 681

Improving a practical DBR buffering approach using Workload Control. J. Riezebos, G. J. Korte and M. J. Land 699

Management by the market constraint in the Hi-Tech industry. S. Pass and B. Ronen 713

Enhancement of Theory of Constraints replenishment using a novel generic buffer management procedure. K.-J. Yuan, S.-H. Chang and R.-K. Li 725

Comparison of DRP and TOC financial performance within a multi-product, multi-echelon physical distribution environment. K. Watson and T. Polito 741

Applying the TOC thinking process in manufacturing: a case study. J. M. Scoggin, R. J. Segelhorst and R. A. Reid 767

Application of Theory of Constraints in an integrated poultry industry. C. V. Chaudhari and S. K. Mukhopadhyay 799

Application of the TOC thinking processes to challenging assumptions of profit and cost centre performance measurement. M. Smith and P. Pretorius 819

Survey-based comparison of performance and change in performance of firms using traditional manufacturing, JIT and TOC. M. L. Sale and R. A. Inman 829

Special Issue Reviewers 845

No. 5 20 March 2003

ASRS sizing for recreating automotive assembly sequences. R. R. Inman 847

Measures of subproblem criticality in decomposition algorithms for shop scheduling. H. AYTUG, K. KEMPF and R. UZSOY 865

Robust computer-aided parameter and tolerance determination for an electronic circuit design. A. JEANG 883

A mathematical model for selecting mixed models with due dates. A. BOLAT 897

Integrated methodology for board assignment and component allocation in printed circuit board assembly. P. NEAMMANEE and S. U. RANDHAWA 919

Multiple response optimization using mixture-designed experiments and desirability functions in semiconductor scheduling. R. M. DABBAS, J. W. FOWLER, D. A. ROLLIER and D. MCCARVILLE 939

The impact of performance and practice factors on UK manufacturing companies' survival. X. LI and D. J. HAMBLIN 963

Scheduling complex job shops using disjunctive graphs: a cycle elimination procedure. S. J. MASON and K. OEY 981

Layout design in dynamic environments: strategies and quantitative indices. M. BRAGLIA, S. ZANONI and L. ZAVANELLA 995

A fuzzy control charting method for individuals. J. D. T. TANNOCK 1017

Statistical analysis of factors influencing the performance of the timeout-based testing model. C. KWAK and Y. YIH 1033

Incorporating heterogeneous distance metrics within block layout design. G. OZDEMIR, A. E. SMITH and B. A. NORMAN 1045

Interleaving dynamics in autonomous vehicle storage and retrieval systems. C. J. MALMBORG 1057

An efficient multi-pass heuristic for project scheduling with constrained resources. P. TORMOS and A. LOVA 1071

A mixed integer linear programming model for set-up reduction superstructures. F. F. GASPARINI and R. Y. QASSIM 1087

Corrigendum 1093

Book reviews 1095

No. 6 15 April 2003

System for enhancing supply chain agility through exception handling. H. Q. XU, C. B. BESANT and M. RISTIC 1099

Economical operation of $(\bar{x}, s)$ control chart indexed by Taguchi's loss function. J. KOBAYASHI, I. ARIZONO and Y. TAKEMOTO 1115

Multiperiod production planning carrying over set-up time. P. PORKKA, A. P. J. VERSÄLÄINEN and M. KUULA 1133

Hierarchical environmental impact evaluation of a process in printed circuit board manufacturing. I. K. HUI, C. P. LI and H. C. W. LAU 1149

Process monitoring for multiple count data using generalized linear model-based control charts. K. R. SKINNER, D. C. MONTGOMERY and G. C. RUNGER 1167

Two-stage simulation optimization for agile manufacturing capacity planning. A. M. URIBE, J. K. COCHRAN and D. L. SHUNK 1181

Scheduling parallel machines to minimize weighted flowtime with family set-up times. M. AZIZOGLU and S. WEBSTER 1199

Incorporating pattern recognition capability in a flexible vibratory bowl feeder using a neural network. S. K. SIM, P. S. K. CHUA, M. L. TAY and G. YUN 1217

Application of artificial neural network to identify non-random variation patterns on the run chart in automotive assembly process. K.-Y. JANG, K. YANG and C. KANG 1239

Dynamic approach to human resources planning for major professional companies with a peak-wise demand. N.-C. R. HWANG and K. KOGAN ... 1255

Comparative modelling of multi-stage production-inventory control policies with lot sizing. G. LIBEROPOULOS and Y. DALLERY 1273

Design for an SPRT control scheme based on linguistic data. F.-J. YU, C.-Y. LOW and S.-S. CHENG 1299

Component allocation for printed circuit board assembly using modular placement machines. M. GRUNOW, H. O. GÜNTHER and M. SCHLEUSENER 1311

A new inspection sampling plan under capacity constraints and multiple shifts. W. JANG 1333

No. 7 10 May 2003

Two FMS scheduling methods based on Petri nets: a global and a local approach. O. KORBAA, A. BENASSER and P. YIM 1349

Process targeting with multi-class screening and measurement error. S. O. DUFFUAA and A. W. SIDDIQUI 1373

Distributed intelligent control of exceptions in reconfigurable manufacturing systems. M. BRUCCOLERI, M. AMICO and G. PERRONE 1393

Dynamic search tree decomposition for balancing assembly lines by parallel search. A. SPRECHER 1413

Composition laws for learning curves of industrial manufacturing processes. F. FRANCESCHINI and M. GALETTO 1431

An investigation on the mechanics of nanometric cutting and the development of its test-bed. X. LUO, K. CHENG, X. GUO and R. HOLT 1449

Scheduling methods for the statistical setup adjustment problem. R. PAN and E. DEL CASTILLO 1467

The impacts of sharing production information on supply chain dynamics: a review of the literature. G. Q. HUANG, J. S. K. LAU and K. L. MAK 1483

Tool condition monitoring in milling based on cutting forces by a neural network. H. SAGLAM and A. UNUVAR 1519

The impact of quality considerations on material flow in two-stage inventory systems. M. KHOUJA 1533

Part allocation to nesting layouts under variable demand. E. NIEMI 1549

Information sharing in multiviewpoint injection moulding design and manufacturing. O. J. Canciglieri and R. I. M. Young 1565

Improved SPC chart pattern recognition using statistical features. A. Hassan, M. S. N. Baksh, A. M. Shaharoun and H. Jamaluddin 1587

No. 8 20 May 2003

Extended structured adaptive supervisory control model of shop floor controls for an e-Manufacturing system. R. Qiu, R. Wysk and Q. Xu 1605

A collaborative agent-based infrastructure for Internet-enabled collaborative enterprises. W. Shen, R. Kremer, M. Ulieru and D. Norrie 1621

Comparing functional and cellular layouts: a simulation study based on standardization. A. A. Assad, S. B. Kramer and B. K. Kaku 1639

Managing modular fixture elements with Tabu Search in a Web-based environment. T. Girish, S. K. Ong and A. Y. C. Nee 1665

Configuring flexible flowlines. M. S. Sodhi and B. R. Sarker 1689

Optimization of machining parameters of Wire-EDM based on Grey relational and statistical analyses. J. T. Huang and Y. S. Liao 1707

Exploratory analysis of flexible workday policies in a job shop. K.-K. Yang, S. Webster and R. Ruben 1721

Message-based Part State Graphs (MPSG): a formal model for shop-floor control implementation. J. S. Smith, S. B. Joshi and R. G. Qiu 1739

Job order releasing and throughput planning for multi-priority orders in wafer fabs. S. H. Chung, W. L. Pearn, A. H. I. Lee and W. T. Ke 1765

Manufacturing system development framework using a data models driven approach. P. K. Jain, Y. Fukuda, M. Yamamoto and T. Fukuma ... 1785

Flexibility-driven index for measuring mass customization feasibility on industrialized products. F. S. Fogliatto, G. J. C. da Silveira and R. Royer 1811

Satisfaction assessment of multi-objective schedules using neural fuzzy methodology. Y. Cha and M. Jung 1831

Book reviews 1851

Call for papers 1853

No. 9 15 June 2003

Decision model for partnership development in virtual enterprises. C.-Y. Huang and Y.-W. Wu 1855

A study of cumulative sum $(\bar{x}, s)$ control charts. Y. Takemoto, K. Watakabe and I. Arizono 1873

A hybrid method for recognizing interacting machining features. W. D. Li, S. K. Ong and A. Y. C. Nee 1887

Maintenance policies for a production system with constrained production rate and buffer capacity. A. Crespo Marquez, J. N. D. Gupta and A. S. Heguedas 1909

Adaptive scheduling in random flexible manufacturing systems subject to machine breakdowns. J. Chen and F. F. Chen 1927

Designing production systems for quality: research opportunities from an automotive industry perspective. R. R. Inman, D. E. Blumenfeld, N. Huang and J. Li 1953

Manufacturing system engineering moderator: an aid for multidiscipline project teams. J. A. Harding, K. Popplewell and D. Cook 1973

Optimizing the decision-making process for large-scale design problems according to criteria interrelationships. M. Yoshimura, K. Izui and Y. Fujimi 1987

Impact of Malcolm Baldrige National Quality Award Criteria on organizational quality performance. S. M. Lee, B.-H. Rho and S.-G. Lee 2003

Revising the master production schedule in sequence dependent processes. J. A. Hill, W. L. Berry and D. A. Schilling 2021

Simulation software for parts feeding in a vibratory bowl feeder. M. H. Jiang, P. S. K. Chua and F. L. Tan 2037

Sensitivity of 'Push' and 'Pull' strategies to information updating rate. R. Weitzman and G. Rabinowitz 2057

Implications of postponement for the supply chain. B. Yang and N. Burns 2075

The effect of correlated demand on the cyclical scheduling system. T. S. Vaughan 2091

No. 10 10 July 2003

Transmuting performance on manufacturing dimensions into business performance: an exploratory analysis of efficiency using DEA. S. Talluri, S. K. Vickery and C. L. Droge 2107

Tool tip gouging avoidance and optimal tool positioning for 5-axis sculptured surface machining. J.-H. Yoon 2125

Non-identical parallel CNC machine scheduling. A. Turkcan, M. S. Akturk and R. H. Storer 2143

A comparison of T^2 control charts with variable sampling schemes as opposed to MEWMA chart. F. Aparisi and C. L. Haro 2169

Sequencing for minimal tooling replacements via a variety of objective functions. P. R. McMullen 2183

The impact of using multiple freeze fences on costs on MRP systems. J. H. Y. Yeung, L. Ma and J. S. Law 2201

Optimization of the machining economics problem for a multistage transfer machine under failure, opportunistic and integrated replacement strategies. M. Kaspi and D. Shabtay 2229

Manufacturing features: verification interaction accessibility and machinability. I. Faraj 2249

A design strategy for reconfigurable manufacturing systems (RMSs) using analytical hierarchical process (AHP): a case study. M. R. Abdi and A. W. Labib 2273

Application of standardization for initial design of plastic injection moulds. M. L. H. Low and K. S. Lee 2301

Unidirectional AGV guidepath network design: a heuristic algorithm. K.-C. Ko and P. J. Egbelu 2325

Development of a real-time multi-objective scheduler for a semiconductor fabrication system. H.-S. Min and Y. Yih 2345

No. 11 20 July 2003

Virtual cell formation. K.-C. Ko and P. J. Egbelu 2365

A review of the support tools for the process of assembly method selection and assembly planning. T. A. Abdullah, K. Popplewell and C. J. Page 2391

Simultaneous optimal selection of design and manufacturing tolerances with different stack-up conditions using genetic algorithms. P. K. Singh, P. K. Jain and S. C. Jain 2411

Taxonomy of information technology adoption patterns in manufacturing firms. C. W. Craighead and R. L. Laforge 2431

An extended distance-based facility layout problem. I. Castillo and B. A. Peters 2451

Sequential resource allocation utilizing agents. A. Wallace 2481

Measuring long-term performance of a manufacturing firm using the Analytic Network Process (ANP) approach. M. Yurdakul 2501

Designing manufacturing cells: a staged approach and a tabu search algorithm. K. Spiliopoulos and S. Sofianopoulou 2531

Design of a sampling strategy for measuring and compensating for overlay errors in semiconductor manufacturing. C.-F. Chien, K.-H. Chang and C.-P. Chen 2547

The efficiency range of economical cutting conditions and tool replacement under the age replacement strategy. D. Shabtay and M. Kaspi 2563

Process planning for rotational parts using the generalized travelling salesman problem. D. Ben-Arieh, G. Gutin, M. Penn, A. Yeo and A. Zverovitch 2581

Capability-based distributed layout approach for virtual manufacturing cells. A. Baykasoğlu 2597

No. 12 15 August 2003

Intelligent scheduling controller for shop floor control systems: a hybrid genetic algorithm/decision tree learning approach. C.-T. Su and Y.-R. Shiue 2619

General and flexible methodology and architecture for CAPP: GF-CAPP system. F. González and P. Rosado 2643

An improved double sampling *s* chart. D. He and A. Grigoryan 2663

Production scheduling using adaptable fuzzy logic with genetic algorithms. J. D. Tedford and C. Lowe 2681

Enhanced CNC lathe capability by addition of a grinding spindle. A. T. Abbas 2699

Novel approach to multi-channel manufacturing system design. F. Ozcelik and A. A. Islier 2711

Expert Enhanced Coloured Stochastic Petri Net and its application in assembly/disassembly. S. Kumar, R. Kumar, R. Shankar and M. K. Tiwari 2727

Quality management practices and operational performance: empirical evidence for Spanish industry. J. Merino-Díaz De Cerio ... 2763

Continuous-time dynamic modelling of variable lead times. J. Wikner 2787

Application of fuzzy logic in the selection of part orientation and probe orientation sequencing for prismatic parts. J. Beg and M. S. Shunmugam 2799

Generally configured supply chain with flexible local control strategies. Zhao Xiaobo, Q. Gong and J. Wang 2817

Platform for an open architecture controller based on a general operation system with a hard real-time extension. Chi Yonglin, Cai Jianguo and Wu Zuyu 2839

Finite capacity scheduling using a predetermined placement sequence. Rodney L. Martin and Christopher White 2851

A note on: On controlling the controllable lead time component in the integrated inventory models. S. K. Goyal 2873

Book Reviews 2877

No. 13 10 September 2003

Selection of management accounting systems in Just-In-Time and Theory of Constraints-based manufacturing. B.-R. Lea and H. Min 2879

A multi-echelon integrated JIT inventory model using the time buffer and emergency borrowing policies to deal with random delivery lead times. H. N. Chiu and H. L. Huang... 2911

Evaluation of supplier contribution to product development: fuzzy and neuro-fuzzy based approaches. G. Nassimbeni and F. Battain 2933

Lead-time reduction through flexible routing: application to Shape Deposition Manufacturing. J. M. Pinilla and F. B. Prinz 2957

A kernel-distance-based multivariate control chart using support vector methods. R. SUN and F. TSUNG 2975

A comparison of deadlock avoidance policies in flexible manufacturing systems. B. HOSACK, F. MAHMOODI and C. T. MOSIER 2991

Design and implementation of an ISO14649-compliant CNC milling machine. W. LEE and Y.-B. BANG 3007

Elaboration and validation of AND/OR graph-based non-linear process plans for shop floor control. P. Y. JANG, Y. J. SON and H. CHO 3019

Automatic segmentation and approximation of digitized data for reverse engineering. Y. ZHONGWEI and J. SHOUWEI 3045

Parallel flowshop scheduling using Tabu search. D. CAO and M. CHEN 3059

Classification scheme for lean manufacturing tools. S. J. PAVNASKAR, J. K. GERSHENSON and A. B. JAMBEKAR 3075

Incorporating links to ISO 9001 into manufacturing process models using $IDEF_{9000}$. J. GINGELE, S. J. CHILDE and M. E. MILES 3091

Dynamic allocation of uncertain supply for the perishable commodity supply chain. C.-W. R. LIN and H.-Y. S. CHEN 3119

No. 14 20 September 2003

Scheduling in dial-indexed production lines. A. GRIECO, E. GUERRIERO, R. MUSMANNO, T. TOLIO and A. ANGLANI 3139

Two- and three-dimensional part orientation by sensor-less grasping and pushing actions: use of the concept of 'attractive region in environment'. H. QIAO 3159

Performance of Fuzzy ART neural network and hierarchical clustering for part–machine grouping based on operation sequences. S. PARK and N. C. SURESH 3185

Modelling and resolving the joint problem of capacity expansion and allocation with multiple resources and a limited budget in the semiconductor testing industry. K.-J. WANG and T. C. HOU 3217

Integrated machining tool path planning using feature free spaces. Y. S. KIM, E. WANG, I.-K. HWANG and H. M. RHO 3237

Strategic management/design approach to a job-shop production system. M. MATSUI and Y. NAKADA 3257

Automatic determination of bending sequences for sheet metal parts with parallel bends. J. C. RICO, J. M. GONZÁLEZ, S. MATEOS, E. CUESTA and G. VALIÑO 3273

Genetic algorithm for minimizing assembly variation in selective assembly. S. M. KANNAN, V. JAYABALAN and K. JEEVANANTHAM 3301

Interaction of design and operational parameters in periodic review kanban systems. F. ERHUN, M. S. AKTURK and A. TURKCAN 3315

Tool requirements planning in a flexible manufacturing system: minimizing tool costs subject to a makespan constraint. Y.-D. KIM, G.-C. LEE, S.-K. LIM and S.-K. CHOI 3339

An investigation on selection of simplified aggregate production planning strategies using MADM approaches. Y.-K. CHEN and H.-C. LIAO ... 3359

A methodology of sculptured surface fitting from CMM measurement data. Y. ZHONGWEI, Z. YUPING and J. SHOUWEI 3375

Optimization of multipass turning operations with genetic algorithms: a note. M.-C. CHEN and K.-Y. CHEN 3385

Corrigendum 3389

Call for papers 3391

No. 15 15 October 2003

Role of workflow management systems in product engineering. W. DERKS, R. WESTON, A. WEST, R. HARRISON and D. SHORTER 3393

Solving the assembly configuration problem for modular products using an immune algorithm approach. L. P. KHOO and T. D. SITUMDRANG... ... 3419

Robustness of the time between events CUSUM. C. M. BORROR, J. B. KEATS and D. C. MONTGOMERY 3435

Clustering-based order-picking sequence algorithm for an automated warehouse. B.-I. KIM, S. S. HERAGU, R. J. GRAVES and A. ST. ONGE 3445

Angular feedrate interpolation for three-dimensional implicit curves. H.-Y. XU, J. DAI, H.-Y. TAM and Y. ZHOU 3461

A coevolutionary algorithm for a facility layout problem. T. DUNKER, G. RADONS and E. WESTKÄMPER 3479

Modelling and analysis of wafer fabrication scheduling via generalized stochastic Petri net and simulated annealing. V. JAIN, R. SWARNKAR and M. K. TIWARI 3501

Automatic parting surface determination for plastic injection mould. C. L. LI 3529

Interactive selection model for supplier selection process: an analytical hierarchy process approach. F. T. S. CHAN 3549

Lower confidence bounds with sample size information for C_{pm} applied to production yield assurance. W. L. PEARN and M.-H. SHU 3581

Recent research on developing Web-based manufacturing systems: a review. H. YANG and D. XUE 3601

Efficient tool path planning for five-axis surface machining with a drum-taper cutter. Y. CAI, G. XI and S. WANG 3631

Book Review 3645

No. 16 10 November 2003

Editorial 3647

Quotes for environmentally weighted recyclability (QWERTY): concept of describing product recyclability in terms of environmental value. J. HUISMAN, C. B. BOKS and A. L. N. STEVELS 3649

Environmental effects of physical life span of a reusable unit following functional and physical failures in a remanufacturing system. S. OKUMURA, T. MORIKUNI and N. OKINO 3667

Concurrent product and closed-loop supply chain design with an application to refrigerators. H. KRIKKE, J. BLOEMHOF-RUWAARD and L. N. VAN WASSENHOVE 3689

Disassembly sequencing: a survey. A. J. D. LAMBERT 3721

Modelling and planning of the disassembly processes using an enhanced expert Petri net. A. K. SINGH, M. K. TIWARI and S. K. MUKHOPADHYAY 3761

Modelling an industrial strategy for inventory management in supply chains: the 'Consignment Stock' case. M. BRAGLIA and L. ZAVANELLA 3793

Agent-based features for CAD browsers to foster engineering collaboration over the Internet. Y. XIE and G. SALVENDY 3809

Algorithm for agile assembling-to-order in the automotive industry. R. R. INMAN and D. M. SCHMELING 3831

A mathematical model and heuristic procedure to schedule printed circuit packs on sequencers. O. A. GHRAYEB, N. PHOJANAMONGKOLKIJ and P. R. FINCH 3849

Inexact genetic algorithm approach to target values setting of engineering requirements in QFD. H. BAI and C. K. KWONG 3861

Nesting of two-dimensional parts in multiple plates using hybrid algorithm. T.-H. WU, J.-F. CHEN, C. LOW and P.-T. TANG... 3883

Queueing network model for a class of material-handling systems. G. L. CURRY, B. A. PETERS and M. LEE 3901

Selection of dispatching rules on multiple dispatching decision points in real-time scheduling of a semiconductor wafer fabrication system. H.-S. MIN and Y. YIH 3921

Investigation of vibratory bowl finishing. J. DOMBLESKY, V. CARIAPA and R. EVANS... 3943

No. 17 20 November 2003

Use of genetic algorithms to solve production and operations management problems: a review. H. AYTUG, M. KHOUJA and F. E. VERGARA 3955

Using Functional Virtual Population as assistance to learn scheduling knowledge in dynamic manufacturing environments. D.-C. LI, L.-S. CHEN and Y.-S. LIN... 4011

Boundary-based passive component inspection approach using eigenvalues of covariance matrices. C.-H. YEH, F.-C. TIEN and F.-C. WU 4025

Integrated assembly plan generation system for grouped product families. H.-Y. LAI and C.-T. HUANG... 4041

Optimal selection of module instances for modular products in reconfigurable manufacturing systems. A. S. YIGIT and A. ALLAHVERDI 4063

Modular product family design: agent-based Pareto-optimization and quality loss function-based post-optimal analysis. R. RAI and V. ALLADA... ... 4075

Cost modelling for feedback control adjustment. G. VENKATESAN 4099

An efficient algorithm for automatic machining sequence planning in milling operations. M. TOLOUEI-RAD 4115

Development of an optimal measuring device selection system using neural networks. S. SON, H. PARK and K. H. LEE 4133

Satisfying due-dates in a job shop with sequence-dependent family set-ups. M. R. TANER, T. J. HODGSON, R. E. KING and K. A. THONEY 4153

Fast algorithm for evaluating the similarity of manufacturing processes within a dynamic production environment. M.-G. HUANG, P.-L. CHANG and Y.-C. CHOU 4171

U-OPT: an analysis of exact U-shaped line balancing procedures. G. R. AASE, M. J. SCHNIEDERJANS and J. R. OLSON 4185

Reactive scheduling in a dynamic and stochastic FMS environment. I. SABUNCUOGLU and O. B. KIZILISIK 4211

Agent-based fractal architecture and modelling for developing distributed manufacturing systems. K. RYU and M. JUNG 4233

No. 18 15 December 2003

Rapid one-of-a-kind product development via the Internet: a literature review of the state-of-the-art and a proposed platform. S. Q. XIE, Y. L. TU, R. Y. K. FUNG and Z. D. ZHOU 4257

Board sequencing and component loading problem for a single machine in PCB assembly planning. N. VAN HOP 4299

Comparing reactive Kanban systems. K. TAKAHASHI 4317

Automatic set-up planning for metal cutting: an integrated methodology. S. H. HUANG and N. XU 4339

Modelling and performance of distributed algorithm for scheduling dissimilar machines with set-up. J. HONG and V. V. PRABHU 4357

Interference-free tool path generation in five-axis machining of a marine propeller. J.-W. YOUN, Y. JUN and S. PARK 4383

Intermittent process hybrid measurement system on the machining centre. F.-J. SHIOU and M.-J. CHEN 4403

Relative importance of contingency variables for advanced manufacturing technology. A. DAS and J. JAYARAM 4429

Scheduling in dynamic assembly job-shops with jobs having different holding and tardiness costs. S. THIAGARAJAN and C. RAJENDRAN 4453

Facilities layout planning based on Fuzzy multiple criteria decision-making methodology. S. K. DEB and B. BHATTACHARYYA 4487

Optimization of GMA welding process using the dual response approach. D. KIM and S. RHEE 4505

A comparison of alternative conceptualizing tools for automated storage and retrieval systems. F. ELDEMIR, R. J. GRAVES and C. J. MALMBORG ... 4517
